

# BEFORE & AFTER

These were taken last summer when we gutted our 1950's basement and made it into a more functional space with a family room, office and guest room.

We renovated this basement the first time about eight years ago and added a suite. This time we took the suite out and used the old kitchen cupboards for the laundry

room. We also moved the bedroom to the other side of the basement so that our guests could have a window that opens.

Now the room feels larger and we spend a lot of time downstairs!
